- Basic OOP understanding
- Fetch, REST API, Web sockets and SQL
- Photoshop, Figma
- Git/Github, VS Code, WebStorm, Chrome Developer Tools (incl. React), NPM, Webpack, Trello

Language

English (C1)

Russian

Uzbek

Software Developer with good programming and problem solving skills looking for new opportunities who would like to join a team of like-minded developers in Frontend. Good at JavaScript coding, solving algorithmic tasks and developing user interfaces. I quickly learn to use new technologies and ready to learn Angular and Vue. Besides, I'm one of those, who is crazy about practical implementations, that's why I conduct the practice with every new tech-stuff in private projects & mini-apps (most of them you can find in my GitHub).

Experience

FEB 2022 - PRESENT
Pet Projects | Warsaw, Poland
Frontend developer

- Building and maintaining user interface components using React hooks, which provide a way to handle state and side effects in a functional component.
- Creating responsive website, cross-browser compatibility and debugging.
- Implementing RESTful API calls using React hooks, such as the useEffect hook, to retrieve and update data from a back-end server.
- Staying up-to-date with the latest developments in JavaScript and related technologies.
- Using Github's version control features to manage the development history.
- Communicating effectively with team members and stakeholders to understand project requirements.
- Writing and maintaining automated tests for the application.
- Using problem-solving skills to find creative solutions to complex development challenges.
